

Iain / Sector Head / Surgical

What was your background prior to working at Sagentia?

I undertook an HND and then at a later date, a Masters degree. I started out with a four year apprenticeship as a toolmaker and was then a product development engineer with a background in industrial ink jet printing.

Why did you choose Sagentia?

I joined Sagentia for the variety of project work, client companies and industries - and it has certainly delivered in this regard. I also wanted to work in a dynamic environment with high calibre colleagues.

I joined as a consultant and have progressed through skill group leadership, running an operating division and am now concentrating on growing our business (profitably!) in a specific market sector - Surgical Devices and Systems.

Why do you enjoy working at Sagentia?

I enjoy Sagentia because days are rarely the same, the environment is stimulating and my colleagues are great. Sagentia is a real enabler for people to excel on client work - we are regularly more than the sum of our parts. I will always remember at a colleague's leaving presentation he said: "it will seem bizarre not to be traveling into Harston to work on Monday morning", which is exactly how I would feel about it too.

Why would you recommend Sagentia?

It offers structure with flexibility, and the opportunities for people to develop their careers are wide. It's a friendly, dynamic and challenging environment. You get to work with some very interesting and talented people!

We are set apart by our business flexibility, client focus, communication and desire to enjoy what we do.

The company hosts an excellent summer party that my family particularly enjoys - especially the dodgems which featured last year!
